Imagine a beetle, not just any beetle, but one of the largest, most impressive beetles in the world - the Hercules beetle! These incredible insects are famous for their size, which can reach up to 6.7 inches long, and their spectacular horn-like structures, which males use to battle each other. The Hercules beetle is shiny and can be green, gray, or brown, and it's known to change its color, almost like magic, depending on the light and the humidity. With their strong bodies, they can carry up to 850 times their own weight, making them one of the strongest creatures on earth.

Speaking of their strength, ever wondered what kind of meals fuel these mighty creatures? Hercules beetles are natural recyclers as they love munching on rotting wood and fruits for dinner. They play a very important role in the ecosystem by helping to break down and recycle dead plants. But remember, just like us, they need water to live, so they often live near streams or places where they can easily access water.

Now that we know what they eat and where they live, let's dive into their fascinating life cycle. Hercules beetles start their life as tiny eggs, which then hatch into larvae, the

stage at which they do most of their growing. They then change into pupae, sort of like beetle teenagers, before finally becoming adult Hercules beetles. This entire process can take up to two years, which is quite long for an insect.

We've learned so much about these amazing beetles, but how do they interact with humans and other animals? In general, they are harmless to humans and prefer to avoid confrontation, using their impressive horns to defend themselves if necessary. They are often kept as pets due to their unique appearance and low maintenance, and have a peaceful relationship with other animals. So, next time you think of Hercules, don't just think of the strong hero from Greek mythology, but also remember the mighty Hercules beetle, one of the largest and strongest beetles in the world.

#### Solve each problem.

5010	e each problem.		
	the article to answer the question. How do Hercules beetles use their horns? A. to protect their eggs	R	to swim in water
	C. to dig burrows		to battle each other
2)	<ul><li>Why are Hercules beetles called recyclers?</li><li>A. They naturally sort plastic from organic waste</li><li>C. They help bees recycle nectar into honey</li></ul>	B.	They collect and store food for the winter They break down and recycle dead plants
•	-		Pranto
3)	What do Hercules beetles eat? A. grass and leaves	B.	other insects
	C. rotting wood and fruits	D.	nectar from flowers
4)	<ul><li>Why are Hercules beetles often kept as pets?</li><li>A. because they are rare and valuable</li><li>C. due to their unique appearance and low maintenance</li></ul>		because they can perform tricks because they are friendly and playful
5)	<ul><li>Are Hercules beetles harmful to humans?</li><li>A. Only males beetles</li><li>C. Yes</li></ul>		Only female beetles No
6)	<ul><li>What is the Hercules beetle famous for?</li><li>A. their ability to change color</li><li>C. their great swimming ability</li></ul>		their long lives their size and horn-like structures
7)	How do Hercules beetles help the ecosystem? A. by creating underground burrows		by breaking down and recycling dead plants
	C. by providing food for other animals	D.	by pollinating flowers
8)	Where would you most likely find a Hercules	bee	etles living?
	A. near a stream		At the top of a mountain
	C. In an urban area	D.	in the desert
9)	Do Hercules beetles have a long or short life	•	•
	A. Short		Depends on the specific beetle The same as other insects
	C. Long		
10)	How long does it take for a Hercules beetle to		
	A. up to five years	В.	up to six months

Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

C. up to two years

D. up to one year

	Hercules Beetles Name:
<u>11</u> )	"I can lift 10,000 times my own weight."
12)	"No one can match my strength. I can lift things 850 times heavier than my own body weight!"
13)	"I start life as a tiny egg, then grow into a larva, that's when I do most of my growing!"
14)	"I don't need fancy food. Give me rotting wood or fruits, that's my kind of meal!"
15)	"I'm one of the biggest beetles you'll ever see. At almost 7 inches long, I'm longer than a dollar bill!"
<b>16</b> )	"I am harmful to humans."
17)	"I despise rotten food, it makes me sick."
18)	"I play my part in keeping nature clean. I help break down and recycle dead plants."
<b>19</b> )	"My transformation from a tiny egg to an adult happens in a few weeks."
20)	"My life cycle is very short."
21)	"I've got pretty amazing horns on my head! I use them to wrestle with other males."
22)	"My horns are just for show, they serve no real purpose."
23)	"I need water to live, so I like to be near streams or places where it's easy for me to find water."
24)	"I'm usually peaceful and try and avoid conflicts. But if necessary, I will use my horns to defend myself."
25)	"I'm always aggressive and ready to fight."
26)	"I don't need much care. That's why many people keep me as a pet."
27)	"From being an egg to growing into an adult, it takes me around two years!"
28)	"I usually live in dry places where water isn't accessible."
29)	"I don't need any water to live."
Dete	ermine if the statement is a fact or opinion based on the information in the article.
30)	Hercules beetles can live up to two years.
31)	Hercules beetles are not at all scary, they are just unique-looking.
32)	Hercules beetles are often found eating decaying wood and fruits.
33)	I think it's amazing how Hercules beetles can change their color, almost like magic.
34)	Hercules beetles can be among the largest beetles in the world, reaching lengths of over 6 inches.
35)	The life cycle of Hercules beetles is fascinating, from eggs to larvae, to pupae, and finally into adult beetles.
36)	Hercules beetles can usually be found near sources of water.
37)	Hercules beetles can lift something that is 850 times heavier than themselves.
38)	Having a Hanaylas hastle as a not can be your interacting due to their unique annearance

- **38)** Having a Hercules beetle as a pet can be very interesting due to their unique appearance.
- **39)** It's cool how Hercules beetles eat decaying plant matter and fruit.

## Determine if the statement is true or false.

**40)** The life cycle of the Hercules beetle can take up to two years.

			N				
<u>41</u> )	Hercules Beetles     Name:       1) Hercules beetle larvae only eat rotting wood.

# Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

	Hercules Beetles Na	me:	Answer	Kev				
11)				<u> </u>				
12)		body						
13)	3) "I start life as a tiny egg, then grow into a larva, that's when I do most of my growing!"							
14)	"I don't need fancy food. Give me rotting wood or fruits, that's my kind of meal!"	•						
15)	15) "I'm one of the biggest beetles you'll ever see. At almost 7 inches long, I'm longer than a dollar bill!"							
<b>16</b> )	"I am harmful to humans."							
17)	"I despise rotten food, it makes me sick."							
<b>18</b> )	"I play my part in keeping nature clean. I help break down and recycle dead plan	ts."						
<b>19</b> )	"My transformation from a tiny egg to an adult happens in a few weeks."							
20)	My life cycle is very short."							
21)	"I've got pretty amazing horns on my head! I use them to wrestle with other male	es."						
22)	"My horns are just for show, they serve no real purpose."							
23)	"I need water to live, so I like to be near streams or places where it's easy for me water."	to find	d					
24)	"I'm usually peaceful and try and avoid conflicts. But if necessary, I will use my defend myself."	horns	to					
25)	"I'm always aggressive and ready to fight."							
26)	"I don't need much care. That's why many people keep me as a pet."							
27)	"From being an egg to growing into an adult, it takes me around two years!"							
28)	"I usually live in dry places where water isn't accessible."							
29)	"I don't need any water to live."							
Dete	termine if the statement is a fact or opinion based on the information in the ar	ticle.						
30)	Hercules beetles can live up to two years.							
31)	Hercules beetles are not at all scary, they are just unique-looking.							
32)	Hercules beetles are often found eating decaying wood and fruits.							
33)	I think it's amazing how Hercules beetles can change their color, almost like mag	gic.						
34)	Hercules beetles can be among the largest beetles in the world, reaching lengths inches.	of ove	er 6					
35)	The life cycle of Hercules beetles is fascinating, from eggs to larvae, to pupae, an into adult beetles.	nd fina	ally					
36)	Hercules beetles can usually be found near sources of water.							
37)	Hercules beetles can lift something that is 850 times heavier than themselves.							
20)								

- 38) Having a Hercules beetle as a pet can be very interesting due to their unique appearance.
- **39**) It's cool how Hercules beetles eat decaying plant matter and fruit.

## Determine if the statement is true or false.

**40**) The life cycle of the Hercules beetle can take up to two years.

	Hercules E	Seet	les	Name:	Answer Key			
<b>41</b> )								
42)	Adult Hercules beetles can carry up to 850 times their own weight.							
43)	The Hercules beetle is one of the smallest be		C					
44)	Hercules beetles may eat rotting wood.							
45)	Hercules beetles can carry up to 10,000 time	s th	eir own weight.					
46)	Hercules beetles will attack humans if they c		-					
47)	Hercules beetles do not need water to live.							
<b>48</b> )	Hercules beetles are often kept as pets.							
<b>49</b> )	The Hercules beetle can change its color dep	bend	ling on the light and humidit	y.				
Dete	ermine which choice is the expanded form o	of th	e underlined contraction.					
	They <u>don't</u> bite or sting humans.							
	A. does not	B.	do not					
	C. did not	D.	will not					
51)	You <u>won't</u> believe how big they can grow.							
	A. will not	B.	cannot					
	C. would not	D.	do not					
52)	Hercules beetles can't fly very far.							
	A. can	В.	are not able					
	C. will not	D.	cannot					
53)	It's amazing how strong they are for their size	e.						
	A. it is	В.	it was					
	C. it will	D.	it has					
54)	They're known for their large horns.							
	A. they will	В.	they were					
	C. they are	D.	they do					
	Determine if the sentence is a declarative(d), exclamatory(e), interrogative(i) or imperative(m).							
55)	Amazing isn't it, that the lifecycle of a Hercu	ıles	beetle can last up to three y	ears!				
56)	Be careful not to touch the hercules heetle's	horr						

- **56**) Be careful not to touch the hercules beetle's horns.
- 57) Are Hercules beetles dangerous to humans?
- **58)** Can you believe Hercules beetles can lift up to 850 times their own body weight? That's like a human lifting an elephant!
- **59**) Hercules beetle larvae mostly eat rotten wood and leaf litter.
- 60) What is the purpose of the large horn on a male Hercules beetle?
- 61) Hercules beetles are harmless to humans and do not bite or sting.
- 62) What do Hercules beetle larvae eat?
- 63) Male Hercules beetles use their large horns to fight other beetles.

Name: Answer Key

64) Observe the unique patterns on the exoskeleton of Hercules beetles.

65) Hercules beetles are one of the largest insects in the world!

**66**) Handle Hercules beetles with care.

Hercules Beetles

#### Solve each problem.

Use	the article to answer the question.		
1)	How do Hercules beetles use their horns? (part		
	А.	В.	to swim in water
	С.	D.	to battle each other
2)	Why are Hercules beetles called recyclers? (p	aragra	ph 2)
	A. They naturally sort plastic from organic waste	В.	They collect and store food for the winter
	С.	D.	They break down and recycle dead plants
3)	What do Hercules beetles eat? (paragraph 2)		
	A. grass and leaves	B.	other insects
	C. rotting wood and fruits	D.	
4)	Why are Hercules beetles often kept as pets?	(para	graph 4)
	A.	B.	because they can perform tricks
	C. due to their unique appearance and low maintenance	D.	
5)	Are Hercules beetles harmful to humans? (par-	agrapł	n 4)
	A. Only males beetles	B.	
	С.	D.	No
6)	What is the Hercules beetle famous for? (parag	raph 1	)
	A. their ability to change color	B.	
	C.	D.	their size and horn-like structures
7)	How do Hercules beetles help the ecosystem	? (par	ragraph 2)
	A. by creating underground burrows	В.	by breaking down and recycling dead plants
	C.	D.	
8)	Where would you most likely find a Hercules	s bee	etles living? (paragraph 2)
	A. near a stream	B.	At the top of a mountain
	С.	D.	
9)	Do Hercules beetles have a long or short life	cyc]	le compared to other insects? (paragraph 3)
	A. Short	B.	
	C. Long	D.	
10)	How long does it take for a Hercules beetle to	0 CO	mplete its life cycle? (paragraph 3)
	A. up to five years	В.	
	C. up to two years	D.	
D		•	

Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

Hercules Beetles

- 11) "I can lift 10,000 times my own weight." (paragraph 1)
- 12) "No one can match my strength. I can lift things 850 times heavier than my own body weight!" (paragraph 1)
