

Guess what, friends? There's a super cool creature called the panther chameleon! This wonderful animal is a type of lizard, but it's not your ordinary lizard! They are famous for their amazing colors which can be a mix of green, blue, red, orange, and even purple! Their eyes can move independently from each other, which means they can look in two different directions at the same time - how cool is that?

Speaking of cool, let's zoom into where these colorful lizards live! Panther chameleons reside in the beautiful island of Madagascar, off the southeast coast of Africa. They love to live in warm, humid areas like rainforests and coastal areas. You'll often find them hanging out in trees and bushes, enjoying the tropical sunshine.

From their treetop homes, panther chameleons have a great view to spot their favorite meals. They love to eat insects like crickets and worms, and sometimes they even munch on small birds and lizards. When it's time for dinner, they use their long, sticky tongues which can be twice as long as their body to catch their prey - yum! Unlike us, they don't drink water from a cup, they lick dew and raindrops off leaves.

Alright, now that we've learned about where they live and what they eat, let's talk about their life cycle and their connection with humans and other animals. Panther chameleons lay eggs and the baby chameleons hatch after about 240 days. They don't interact much with humans or other animals, but they do have a unique defense mechanism - they can change their skin color when they feel threatened! So, that's the panther chameleon for you, friends - a truly amazing animal that brings color and wonder to our world.

Solve each problem.

Use the article to answer the question.

- 1) What is the Panther Chameleon?
 - A. A type of bird
 - B. A type of fish
 - C. A type of insect
 - D. A type of lizard
- 2) How long does it take for panther chameleon eggs to hatch?
 - A. About 90 days.
 - B. About 60 days.
 - C. About 120 days.
 - D. About 240 days.
- 3) Where can you often find panther chameleons in their natural habitat?
 - A. In trees and bushes
 - B. In riverbeds
 - C. Underground in burrows
 - D. In open fields
- 4) What body part do panther chameleons use to catch their prey?
 - A. Their sticky tongues.
 - B. Their powerful tail.
 - C. Their sharp claws.
 - D. Their strong jaws.
- 5) What do panther chameleons like to eat?
 - A. Insects, small birds and lizards.
 - B. Nuts and seeds.
 - C. Grass and leaves.
 - D. Fruits and vegetables.
- 6) What is special about the eyes of a panther chameleon?
 - A. They can see long distances
 - B. They can move independently and look in two different directions
 - C. They can see colors that humans can't
 - D. They can see in the dark
- 7) How do panther chameleons drink water?
 - A. They suck up water from the ground
 - B. They lick dew and raindrops off leaves
 - C. They drink from rivers and lakes
 - D. They absorb water through their skin
- 8) Where do panther chameleons live?
 - A. Madagascar
 - B. The Amazon rainforest
 - C. North American forests
 - D. Australian Outback
- 9) What do panther chameleons do when they feel threatened?
 - A. They change their skin color.
 - B. They make a loud noise to scare away the threat.
 - C. They run away very fast.
 - D. They puff up their body to look bigger.
- 10) What kind of areas in Madagascar do panther chameleons like to live?
 - A. Warm, humid areas.
 - B. Grassy plains.
 - C. Dry, Desert areas.
 - D. Cold, mountainous areas.

Determine if the statements is something the animal would say (W) or it is not something the animal would say (N).

- 11) "I live in the chilly mountains, amongst the ice and snow. The cold never bothers me!"
- 12) "For breakfast, lunch, and dinner, I love munching on insects! Yummy crickets are my favorite."
- 13) "When I spot my insect meal, I use my extra long, sticky tongue to catch it."
- 14) "Unlike you, I don't drink water from a cup, I lick dew off leaves."
- 15) "Long, sticky tongue? Nope, my tongue is short and smooth."
- 16) "We give live birth, we don't lay eggs."
- 17) "To be honest, I have a strong dislike for sunny spots. I'm a cave dweller, find me hiding from sunlight."
- 18) "I love to drink from streams and ponds."
- 19) "Can't stand insects, they're yucky! I feast on fruits and vegetables."
- 20) "I can look in two different directions at the same time with my eyes! It helps me spot any danger easily."
- 21) "You'll never see me in a tree. I prefer to stay on the ground."
- 22) "Did you know us chameleons change colors? We can turn from green to red to purple!"

Determine if the statement is a fact or opinion based on the information in the article.

- 23) Panther chameleons have tongues that can be twice as long as their body.
- 24) Panther chameleons, with their independent moving eyes, are the most unique creatures on the planet.
- 25) Panther chameleons often live in trees and bushes.
- 26) Panther chameleons make the most boring pets because they spend so much time in one place.
- 27) Panther chameleons can look in two different directions at the same time.
- 28) Panther chameleons live in the most beautiful places in the world - rainforests and coastal areas.
- 29) Panther chameleons prefer to live in warm, humid areas such as rainforests and coastal areas.
- 30) The island of Madagascar is the home of panther chameleons.
- 31) Panther chameleons are amazing creatures because they can change their skin color when they feel threatened.
- 32) Panther chameleons look way cooler than other lizards with their bright colors.

Determine if the statement is true or false.

- 33) Panther chameleons are a type of lizard.
- 34) Panther chameleons give birth to live young.
- 35) Panther chameleons can be found in Madagascar.
- 36) Panther chameleons only eat vegetables.
- 37) Panther chameleons will eat small birds.
- 38) Panther chameleons prefer to live in cold dry areas.
- 39) Panther chameleons live near the coast of Texas.
- 40) Panther chameleons live mostly in the desert.
- 41) A chameleon's tongue can be twice as long as their body.
- 42) Panther chameleons have eyes that can move in different directions.

Determine if the sentence is a declarative(d), exclamatory(e), interrogative(i) or imperative(m).

-
- 43) Panther chameleons have long tongues that they use to catch their prey.
 - 44) Do panther chameleons have any predators?
 - 45) Panther chameleons live in rainforests and are native to Madagascar.
 - 46) Panther chameleons can change colors to blend in with their surroundings.
 - 47) Do panther chameleons have long tongues?
 - 48) How do panther chameleons change colors?
