

Whoosh! Did you just see that flash of white in the sky? That's a snowy owl, one of the most magnificent creatures on earth. They are large, white owls with a rounded head, yellow eyes, and a black beak. These owls are unique because unlike most other owls, they are active during the day, especially in the summer. Their white feathers not only make them look beautiful but also help them blend in with their snowy surroundings.

Speaking of snowy surroundings, let's dive into where these beautiful birds call home. Snowy owls love the cold and can be found in the icy regions of North America and Eurasia. They prefer wide open spaces like tundras, fields, or beaches, where they can easily spot their prey from a distance. During the winter, they may travel south in search of food, often surprising people who aren't used to seeing them.

Now, you might be wondering, what do these snowy owls munch on during those cold winter months? Well, they're skilled hunters that feast on a diet primarily of lemmings and other small rodents. However, if rodents are scarce, they can switch to birds and even fish! Watching a snowy owl swoop down to catch its meal is an amazing sight.

So, how do snowy owls get along with other animals and us humans? While they're usually not aggressive towards humans, they're known to defend their nests fiercely against predators. Compared to other owl species, snowy owls are more sociable and can sometimes be seen hunting in groups. So there you have it, the snowy owl, a beautiful, tenacious, and fascinating bird that lights up the snowy landscapes.

**Solve each problem.****Use the article to answer the question.**

- 1) What color are the feathers of snowy owls?
 - A. Brown
 - B. Gray
 - C. Black
 - D. White

- 2) What do snowy owls do during winter?
 - A. Travel south in search of food
 - B. Bury themselves in the snow
 - C. Hide away and hibernate
 - D. Stay put in their icy homes

- 3) What color is the beak of a snowy owl?
 - A. Yellow
 - B. Black
 - C. White
 - D. Red

- 4) Do snowy owls hunt alone or in groups?
 - A. With other types of birds
 - B. Alone
 - C. With other animals
 - D. In groups

- 5) Are snowy owls usually aggressive towards humans?
 - A. Only males
 - B. Only females
 - C. No
 - D. Yes

- 6) What color are the eyes of snowy owls?
 - A. Blue
 - B. Brown
 - C. Yellow
 - D. Green

- 7) When are snowy owls active?
 - A. At dawn
 - B. At dusk
 - C. During the day
 - D. During the night

- 8) Where can snowy owls be found?
 - A. In the tropical regions of Africa
 - B. In the icy regions of North America
 - C. In the jungles of South America
 - D. In the deserts of Australia

- 9) Why do snowy owls prefer wide open spaces?
 - A. To easily spot their prey from a distance
 - B. To avoid predators
 - C. To have more space for flying
 - D. To find more nesting materials

- 10) What do snowy owls usually eat?
 - A. Lemmings and rodents
 - B. Grass and leaves
 - C. Other owls
 - D. Fruits and nuts

Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

- 11) "I prefer to hunt alone, without any other owls around."

- 12) "I may be nocturnal, but I like to change the rules sometimes! During summers, I stay awake and active in the day!"
- 13) "When I can't find rodents, I don't mind hunting birds and even fish. It's all about survival, you see!"
- 14) "Unlike other birds who love warm climates, I thrive in icy cold regions."
- 15) "I have a pristinely white body, and a big round head with shining yellow eyes. Oh and can't forget my sharp black beak!"
- 16) "My colorful feathers make me stand out in my snowy surroundings."
- 17) "I like living in dense forests with towering trees."
- 18) "You can often find me in cold places, like snowy fields and open tundras."
- 19) "I rely only on small rodents for my meals."
- 20) "I prefer hunting at night, just like my owl cousins."
- 21) "I prefer to live in wide open spaces where I can spot my prey from far away."
- 22) "I enjoy living in warm, tropical climates."
- 23) "Lemmings and rodents look out, they're my primary prey."
- 24) "My feathers help me blend into my surroundings."
- 25) "Rodents are my favorite, I never eat birds or fish."
- 26) "Guess what, unlike other owl species, I don't mind company and I'm not as shy. Look for me hunting in groups sometimes."
- 27) "I am usually friendly towards humans, but if my nest is in danger, I know how to fight back!"
- 28) "Winter is a time for hibernation, not for hunting."
- 29) "I blend in best with dark forests, not snow."

Determine if the statement is a fact or opinion based on the information in the article.

- 30) Snowy owls are skilled hunters that primarily eat lemmings and other small rodents.
- 31) Snowy owls yellow eyes are very striking.
- 32) Snowy owls prefer wide open spaces like tundras, fields, or beaches.
- 33) It is amazing to see a snowy owl fly during the day.
- 34) Snowy owls have yellow eyes and a black beak.
- 35) It is an amazing sight to see a snowy owl swoop down and catch its meal.
- 36) Snowy owls can sometimes be seen hunting in groups.
- 37) Unlike most other owls, snowy owls are active during the day, especially in the summer.
- 38) Snowy owls are fascinating because they are active during the day, not like most other owls.
- 39) Snowy owls are the most beautiful creatures, with their large, white feathers.

Determine if the statement is true or false.

- 40) Snowy owls are skilled hunters that feast on a diet primarily of lemmings and other small rodents.

- 41) During winter, snowy owls will hibernate in caves.
- 42) Snowy owls can sometimes be seen hunting in groups.
- 43) Snowy owls can be found in the icy regions of Africa.
- 44) Snowy owls prefer wide open spaces like tundras.
- 45) Snowy owls only eat fish.
- 46) Snowy owls prefer to live alone.
- 47) Snowy owls are usually aggressive towards humans.
- 48) Snowy owls are known to defend their nests fiercely against predators.
- 49) Snowy owls are active during the day, especially in the summer.

Determine if the sentence is a declarative(d), exclamatory(e), interrogative(i) or imperative(m).

- 50) Female snowy owls are larger than males and have more markings on their feathers.
- 51) Do snowy owls have sharp talons?
- 52) Snowy owls can fly silently, which helps them catch their prey by surprise.
- 53) Snowy owls have powerful beaks and sharp talons to catch their prey.
- 54) Do snowy owls hunt during the day?
- 55) Are snowy owls a species of birds?
