

Shade in the visual fraction to find the equivalent fraction.

Ex)

$$\frac{1}{4} = \frac{3}{12}$$

1)

$$\frac{4}{6} =$$

2)

$$\frac{3}{4} =$$

3)

$$\frac{9}{9} =$$

4)

$$\frac{0}{3} =$$

5)

$$\frac{1}{2} =$$

6)

$$\frac{1}{4} =$$

7)

$$\frac{1}{2} =$$

8)

$$\frac{3}{6} =$$

9)

$$\frac{6}{10} =$$

**Answers**Ex. $\frac{3}{12}$

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

Finding Equivalent Fractions

Name: **Answer Key**

Shade in the visual fraction to find the equivalent fraction.

Answers

- Ex. $\frac{3}{12}$
1. $\frac{2}{3}$
2. $\frac{6}{8}$
3. $\frac{4}{4}$
4. $\frac{0}{10}$
5. $\frac{5}{10}$
6. $\frac{2}{8}$
7. $\frac{2}{4}$
8. $\frac{1}{2}$
9. $\frac{3}{5}$
