

## Two Step Problems

Name: \_\_\_\_\_

**Solve each problem.**

- 1) Rachel and her friends were recycling paper for their class. For every four pounds they recycled they earned 1 point. If Rachel recycled ten pounds and her friends recycled six pounds, how many points did they earn?
  
- 2) For homework Maria had sixty-three math problems and eighteen spelling problems. If she can finish nine problems in an hour how long will it take her to finish all the problems?
  
- 3) For Halloween Isabel received twenty-one pieces of candy from neighbors and three pieces from her older sister. If she only ate six pieces a day, how long would the candy last her?
  
- 4) A group of eight friends went into a restaurant. The chef already had thirteen chicken wings cooked but cooked thirty-five more for the group. If they each got the same amount how many would each person get?
  
- 5) Nancy's class is going on a field trip to the zoo. If each van can hold six people and there are eighteen students and eighteen adults going, how many vans will they need?
  
- 6) The school's baseball team had fourteen new players and two returning players. If the coach put them into groups with eight players in each group, how many groups would there be?
  
- 7) While playing at the arcade, Edward won eight tickets playing 'whack a mole' and four tickets playing 'skee ball'. If he was trying to buy candy that cost three tickets a piece, how many could he buy?
  
- 8) The school's debate team had thirty-eight boys and ten girls on it. If they were split into groups of six how many groups could they make?
  
- 9) Dave made eleven dollars mowing lawns and five dollars weed eating. If he only spent eight dollar a week, how long would the money last him?
  
- 10) A pet shelter had six puppies when another nine were brought in. If five puppies a day are adopted, how long would it take for all of them to be adopted?

## Two Step Problems

Name: **Answer Key**

Solve each problem.

- 1) Rachel and her friends were recycling paper for their class. For every four pounds they recycled they earned 1 point. If Rachel recycled ten pounds and her friends recycled six pounds, how many points did they earn?  
**4**
- 2) For homework Maria had sixty-three math problems and eighteen spelling problems. If she can finish nine problems in an hour how long will it take her to finish all the problems?  
**9**
- 3) For Halloween Isabel received twenty-one pieces of candy from neighbors and three pieces from her older sister. If she only ate six pieces a day, how long would the candy last her?  
**4**
- 4) A group of eight friends went into a restaurant. The chef already had thirteen chicken wings cooked but cooked thirty-five more for the group. If they each got the same amount how many would each person get?  
**6**
- 5) Nancy's class is going on a field trip to the zoo. If each van can hold six people and there are eighteen students and eighteen adults going, how many vans will they need?  
**6**
- 6) The school's baseball team had fourteen new players and two returning players. If the coach put them into groups with eight players in each group, how many groups would there be?  
**2**
- 7) While playing at the arcade, Edward won eight tickets playing 'whack a mole' and four tickets playing 'skee ball'. If he was trying to buy candy that cost three tickets a piece, how many could he buy?  
**8**
- 8) The school's debate team had thirty-eight boys and ten girls on it. If they were split into groups of six how many groups could they make?  
**2**
- 9) Dave made eleven dollars mowing lawns and five dollars weed eating. If he only spent eight dollar a week, how long would the money last him?  
**3**
- 10) A pet shelter had six puppies when another nine were brought in. If five puppies a day are adopted, how long would it take for all of them to be adopted?  
**3**

**Answers**

1. **4**
2. **9**
3. **4**
4. **6**
5. **6**
