

Two Step Problems

Name: _____

Solve each problem.

- 1) John had fifty dollars. For his birthday he got forty-three more dollars but spent fifty-four on a new game. How much money does he have now?

- 2) The school cafeteria ordered thirty-five red apples and fourteen green apples for student's lunches. But, if only two students wanted fruit, how many extra did the cafeteria end up with?

- 3) For the school bake sale Lana made pastries. She baked four cupcakes and twenty-three cookies. After the sale she had twenty-one to take back home. How many pastries did she sell?

- 4) At the school's book fair George bought forty-two adventure books and thirty-four mystery books. If sixteen of the books were used, how many new books did he buy?

- 5) Vanessa had ten math problems and nineteen science problems for homework. If she finished six of the problems at school, how many problems did she have to do for homework?

- 6) Oliver was trying to expand his game collection. He bought twenty games from a friend and bought thirty-one more at a garage sale. If two of the games didn't work, how many good games did he end up with?

- 7) Olivia bought two coloring books. One had forty-three pictures and the other had thirty-nine. After one week she had already colored two of the pictures. How many pictures does she still have to color?

- 8) Paige picked forty-two tulips and twenty roses to make flower bouquets. If she only used fifteen of the flowers though, how many extra flowers did Paige pick?

- 9) While on vacation, Bianca took sixteen pictures at the zoo and seventeen at the museum. If she later deleted twenty-eight of the pictures, how many pictures from her vacation did she still have?

- 10) At the arcade, Sam won seventeen tickets playing 'whack a mole' and thirty-eight tickets playing 'skee ball'. If he spent thirteen of his tickets on a hat, how many tickets does Sam have left?
