**Solve each problem.**

### Answers

- 1) Tom invited six friends to a birthday party, but three couldn't come. If he wanted to buy enough cupcakes so each person could have exactly five, how many should he buy?
- 2) A trivia team had ten members total, but during a game three members didn't show up. If each member that did show up scored two points, how many points were scored total?
- 3) A magician was selling magic card decks for six dollars each. If he started with thirteen decks and by the end of the day he had four left, how much money did he earn?
- 4) Mike had two action figures, but needed seven total for a complete collection. If each one costs \$2, how much money would he need to finish his collection?
- 5) There were eight friends playing a video game online when six players quit. If each player left had four lives, how many lives did they have total?
- 6) Henry earned eight dollars for each lawn he mowed. If he had ten lawns to mow, but forgot to mow three of them, how much money did he actually earn?
- 7) Will bought nine boxes of chocolate candy and gave three to his little brother. If each box has four pieces inside it, how many pieces did Will still have?
- 8) At lunch a waiter had ten customers and four of them didn't leave a tip. If he got \$9 each from the ones who did tip, how much money did he earn?
- 9) April's discount flowers was having a sale where each rose was five dollars. If April started with eight roses and had six roses left, how much money did she earn?
- 10) Amy baked six brownies, but needed fifteen total for her party. If she used seven spoonfuls of flour on each one, how much cups of flour does she still need?
