

Solve each problem.

Answers

- 1) Luke earned seven dollars for each lawn he mowed. If he had twelve lawns to mow, but forgot to mow three of them, how much money did he actually earn?
- 2) There were eleven friends playing a video game online when three players quit. If each player left had four lives, how many lives did they have total?
- 3) A magician was selling magic card decks for eight dollars each. If he started with sixteen decks and by the end of the day he had eight left, how much money did he earn?
- 4) A trivia team had ten members total, but during a game two members didn't show up. If each member that did show up scored nine points, how many points were scored total?
- 5) Vanessa baked three brownies, but needed ten total for her party. If she used two spoonfuls of flour on each one, how much cups of flour does she still need?
- 6) Nancy earned four points for each bag of cans she recycled. If she had thirteen bags, but didn't recycle five of them, how many points would she have earned?
- 7) A worksheet had eight problems on it. If a teacher had four worksheets to grade and had already graded two of them, how many more problems does she have to grade?
- 8) At lunch a waiter had twelve customers and seven of them didn't leave a tip. If he got \$6 each from the ones who did tip, how much money did he earn?
- 9) A new building needed fourteen windows. The builder had already installed six of them. If it takes two hours to install each window, how long will it take him to install the rest?
- 10) A painter needed to paint fifteen rooms in a building. Each room takes two hours to paint. If he already painted six rooms, how much longer will he take to paint the rest?
